

SWIMMING POOL PUMP

SP-JP17-15/500

DESCRIPTION: The Bundu Power Solar swimming pool pump is designed to run without any need for batteries. When the sun comes up in the morning the pump will start to work and when it goes down at night the pump will stop. This gives the pump sufficient time to keep your pool clean and reduce your electricity bill with an off-grid solution.

APPLICATIONS INCLUDE: Swimming Pools, Ponds, Irrigation, Aquariums and Fountains

SWIMMING POOL PUMP | SP-JP17-15/500

Max. Flow rate	17 (m³/h)	Input Voltage	48 - 72v
Max. lift	15m	Type of Enclosure	IP54
Ambient Temp	-30 to +45 °C	Max. power	500w
Length	520mm	Class of Insulation	F
Width	220mm	Suction Inlet Lift	3m
Height	350mm	Max Casing Pressure	2.5bar
Weight	8.7kg	Max Water Temp.	+60°C
Power Required	660w	Max Input	1500w

* Please Note this is to calculate an estimate of your power consumption. A qualified electrician should always be used for final calculation.

*ALL RATINGS are in an optimum operating environment. Clear Skies, Correct Installation, Midday sun.
